PetroBot Online Tank Inspection Rover

Make your storage tank inspection Headache-Free!

Introducing the PetroBot ITIS Rover, the online storage tank inspection solution. With its array of immersion ultrasonic probes, the ITIS Rover can carry out comprehensive bottom plate scanning and corrosion surveys while the tank is in operation and filled. This means that you can inspect your tanks on-stream without any downtime, saving time and cleaning costs. The ITIS Rover is ATEX and PESO certified, so it can be used in hazardous areas without any issue. Plus, its inspection data acquisition and navigation module ensures safety from unwanted accidents. Save time, money, and extend the service life of your tank as per OISD STD 129 / API STD 653 with the PetroBot ITIS Rover.

ATEX Certified

PESO Certified
